## SUBJECT INDEX

- Acid-base  
   pH regulation, central chemosensitivity (snail), 209  
   ventilation,  $K^+$ , 171  
 Adrenoceptors  
    $\beta$ , somatostatin, airway smooth muscle, 99  
   carotid body, hypoxia, 67  
 Age  
   dependence, closing volume, immersion, 273  
 Airways  
   somatostatin,  $\beta$ -adrenergic relaxation, 99  
 Amphibians  
   bullfrog (*Rana catesbeiana*), 81  
   salamanders (*Siren intermedia*, *Amphiuma tri-dactylum*), 249  
   toad (*Bufo marinus*), 249  
 Birds  
   chicken, 11  
 Breathhold  
   distress, rebreathing relief, 53  
 Breathing pattern  
   deglutition, 181  
 Calcium  
   diet, eggshell formation, 11  
 Capillary  
   geometry, flight muscle (bat), 155  
 Carbon dioxide  
   cerebral blood flow, temperature (turtle), 329  
 Cardiogenic oscillations  
   inert gas washout, 147  
 Carotid body  
   oxygen sensing, 1  
   SP, SP antagonists, 295  
   sympathetic innervation, 67  
 Cerebral blood flow  
    $CO_2$  response, temperature (turtle), 329  
 Chemoreceptors  
   carotid body, oxygen sensing, 1  
   central,  $CO_2$  vs fixed acid (snail), 209  
   feedback, episodic breathing (frog), 81  
   ventilation,  $K^+/H^+$  interaction, 171  
 Closing volume  
   immersion, age, 273  
    $CO_2$  response  
     steady state vs rebreathing, caffeine, 311  
 Compliance  
   developing horse, 21  
 Conductance  
   gas, eggshell, 11  
 Control of breathing  
   central chemoreception (snail), 209  
    $CO_2$  response, caffeine, 311  
   deglutition, 181  
    $K^+/H^+$  interaction, 171  
   lung afferents, halogenated anesthetics, 281  
 Decompression  
   sickness, gas bubble formation, 131  
 Deglutition  
   breathing pattern, 181  
 Development  
   muscle metabolism, fetal to adult (sheep), 337  
   respiratory mechanics (horse), 21  
 Diffusion  
   gases, bubbles in liquid, 131  
 Distensibility  
   lung, 239  
 Edema  
   lung, protein, surfactant function, 43  
 Egg  
   shell formation, acetazolamide (chicken), 11  
 Enzyme activity  
   muscle, training, 227  
   oxygen sensing, carotid body, 1  
 Exercise  
   training, muscle enzyme activity, 227  
 Flight  
   muscle, capillary-fiber geometry (bat), 155  
 Flow  
   maximum inspiratory, maximum  $O_2$  uptake, 109  
 Gas exchange  
   cardiogenic mixing, 147  
   inert gas washout, 147

- Hemoglobin
  - affinity, hibernation, 195
  - O<sub>2</sub> equilibrium, shape, 321
- Hibernation
  - metabolism, O<sub>2</sub> equilibrium curve, 195
- Hydrogen peroxide
  - O<sub>2</sub> sensing, 1
- Hypercapnia
  - episodic breathing (frog), 81
- Hypoxia
  - carotid body, sympathetic innervation, 67
  - episodic breathing (frog), 81
  - SP, carotid body, 295
- Inert gases
  - bubble formation, 131
  - Xe, elimination, cardiogenic mixing, 147
- Inspiration
  - maximal flow vs maximal O<sub>2</sub> uptake, 109
- Invertebrates
  - snail (*Helix aspersa*), 209
- Lung volume
  - developing horse, 21
  - low, mechanics of breathing, 119
- Mammals
  - bat (*Pipistrellus hesperus*), 155
  - cat, 67, 171
  - dog, 99, 119, 281
  - ground squirrel (*Spermophilus lateralis*), 195
  - horse, 21
  - humans, 53, 109, 181, 273, 311, 321
  - rabbit, 43
  - rat, 227, 295
  - sheep, 239, 259, 337
- Mechanics of breathing
  - closing volume, immersion, 273
  - developing horse, 21
  - dynamic elastance, resistance, low lung volume, 119
  - static pressure-volume, 239
  - surfactant, protein, 43
- Mediators
  - SP, carotid body, 295
- Metabolism
  - depression, hibernation, O<sub>2</sub> equilibrium curve, 195
  - muscle, developing sheep, 337
- Models
  - gas bubbles, 131
- Muscle
  - aerobic, anaerobic metabolism, comparison
  - heart, diaphragm, locomotory, 337
  - diaphragm, digoxin, 259
  - oxidative capacity, exercise, 227
- Oxidative capacity
  - muscle, training, 227
- Oxygen
  - sensing, carotid body, 1
  - transport, flight muscle (bat), 155
- Oxygen equilibrium curve
  - shape, oxygen transport, 321
  - temperature, hibernation, 195
- Pattern of breathing
  - episodic breathing, 81
- Pharmacological agents
  - acetazolamide, 11
  - caffeine, CO<sub>2</sub> response, 311
  - digoxin, diaphragm contraction, 259
  - halogenated anesthetics (halothane, enflurane, isoflurane), 281
  - SP antagonists, 295
- Pores
  - eggshell, 11
- Pressure
  - hydrostatic, surfactant composition (amphibians), 249
  - static, lung volume, 239
  - trans-diaphragmatic, digoxin, 259
- Rebreathing
  - relief breathhold distress, 53
- Receptors
  - pulmonary stretch, anesthetics, 281
- Reptiles
  - turtle, freshwater (*Pseudemys scripta*), 329
- Sensation
  - distress, breathhold, rebreathing relief, 53
- Smooth muscle
  - airways, somatostatin, 99
- Surfactant
  - composition, temperature, pressure (amphibians), 249
  - protein, lung edema, 43
- Swallowing
  - see deglutition, 181
- Symmorphosis
  - peak inspiratory flow, maximum O<sub>2</sub> uptake, 109

**Temperature**

- cerebral blood flow, CO<sub>2</sub> response (turtle), 329
- surfactant composition (amphibians), 249

**Volume**

- lung, static pressure, 239
